

# Sandbox exploration with the Datasphere Initiative

**Is a sandbox the solution you need?** Let's explore whether this tool can address your data governance questions, regulatory challenges, and data sharing opportunities.

Are you an authority faced with the following:

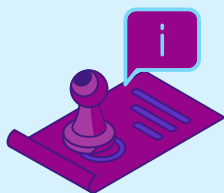

1

## Navigating regulatory challenges

- Are you facing challenges in adapting regulations to emerging data technologies?
- Would you benefit from reducing legal uncertainty while fostering innovation?
- Are you looking for ways to experiment, dialogue, learn, imagine and co-create to test and develop effective regulation that enables the trusted use of data?

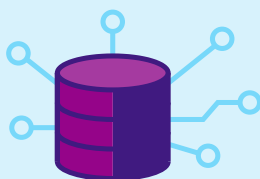

2

## Enhancing regulatory understanding

- Are you seeking ways to ensure regulatory frameworks and policies are understood by solution providers?
- Do you need to evaluate how novel data products or services align with existing regulations?
- Would collaborative interpretation of regulations benefit your stakeholders?

3

## Facilitating responsible data sharing

- Are you looking for ways to unlock data to enable research and innovation with cutting edge technologies like AI ?
- Do you wish to have a space to test new data sharing approaches such as privacy enhancing technologies and emerging intermediaries?
- Would you like to explore secure and compliant mechanisms to facilitate cross-sector, cross-regulatory or cross-border data collaborations?

**If your answer is yes to any of the questions**, book a **“LEARN”** or **“EXPLORE”** session with us to determine how a sandbox approach suits your specific needs. During these sessions, we:

- Assess your unique challenges and goals
- Evaluate whether a sandbox is the appropriate solution
- Introduce our services for responsibly unlocking the value of data
- Discuss potential collaboration based on your requirements

# Your Sandbox Journey Starts Here!

**Sandboxes:** are powerful tools to design, test, and scale responsible innovation.

At the Datasphere Initiative, we support your sandbox journey — whether you're just getting started or scaling a regulatory or operational sandbox.

**Here is how:**

## 1. LEARN: with our exploration and coaching sessions

*Build a shared understanding of what sandboxes are and why they matter.*

**Sandbox Readiness Blueprint** – A diagnostic session to assess whether a sandbox fits your data governance needs & regulatory challenges.

**Masterclass on Sandboxes** – A deep dive into the sandbox as an agile governance methodology, tailored to both beginner & advanced teams.

**Coaching Journeys** – A modular, hands-on, one-on-one approach aimed at enhancing organizational readiness to design and run sandboxes responsibly and effectively.

### Who is this for?

For individuals and teams seeking to learn about the potential of sandboxes to address emerging technologies' governance or regulatory challenges, align stakeholders or internal departments, or start a sandbox conversation.

\*\*\*Options include\*\*\*

## 2. EXPLORE with our Co-Creation Lab sessions

*Sandbox co-creation labs are interactive workshops that guide teams to design sandbox environments for specific focus areas.*

**Framing and Recommendations Report** – Documentation of key discussions, identification of opportunities and barriers, and strategic recommendations for next steps.

**Sandbox Canvas** – Clarity of core elements such as scope, actors, legal models, and infrastructure.

**Sandbox Roadmap** – Practical action plan outlining priority steps, milestones, required resources, and stakeholder responsibilities for launching a sandbox initiative.

### Who is this for?

Institutions and consortiums that want to explore sandboxing for specific challenges (or regulatory questions) and align internal and external partners.

\*\*\*Results include\*\*\*

## 3. DO: Implement a sandbox with Our Five-Phase Support Framework

1. **Preparedness** – Awareness, assessment, coordination, and training
2. **Sandbox Set-Up** – Framing, design, stakeholder mapping
3. **Operation** – Facilitation, iteration, and feedback mechanisms
4. **Engagement & Communication** – Narrative building and outreach strategy
5. **Exit & Evaluation** – Closing, documentation and evaluation

### Who is this for?

For teams that are ready to design, launch or scale a sandbox.

*From concept to completion, we guide you through our five phases of Sandbox implementation. Whether you need templates, strategic advice, or full facilitation, we offer flexible levels of support tailored to your timeline and team.*
